RE: Corrective action on items 1 (cyanide storage), 2, 4 and 8 from the BLM's letter dated April 3, 1995.

Dear Rody:

The following cleanup actions have been completed at the Drum Mine:

Item 1 (cyanide storage)

The 20 barrels of sealed sodium cyanide have been moved inside the mill to the area indicated to you in your last visit.

Item 2

The lead batteries (3500 pounds) that were on the waste dump have been shipped and sold to Swenson Metal Salvage in Spanish Fork. A copy of the receipt is enclosed.

Item 4

The sample bags on the waste dump have been placed in trenches for burial. The trenches will remain open until approval by your department.

Item 8

The assay laboratory has been cleaned.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dave Hartshorn".
